### **Destination**

---

International Forum on ANSI-41 Standards Technology  
IFAST Meeting #18  
San Francisco, CA, USA

### **Abstract**

---

A summary of the status of SID administration.

### **Recommendation**

---

For information only.

## **IFAST SID Administrator's Report**

---

- No SID assignments have been requested or made since David Crowe was appointed SID administrator in May, 2001.
  - No SID codes have been relinquished. The IFAST secretariat has circulated a letter requesting that countries that only use wireless systems that do not require SID codes (e.g. GSM, NMT) should relinquish their assignment.
  - The presence of ANSI-41 systems in Europe (Romania, CDMA-450 system) may affect the ability to withdraw all SID's from countries that are currently all GSM.
  - It appears that many Brazilian carriers are using incorrect SID values. This has not yet been confirmed, nor has a corrective plan been developed. If it is confirmed, at the minimum, the conflicts should be incorporated in the IFAST published information.
  - A more automated scheme for updating SID files on the IFAST website has been developed (using FileMaker database software).
  - Support for PDF versions of SID files has been withdrawn. Only html files will be maintained (plus the FileMaker database).
-
